Here some days may be values zero will come, but i dont want to show if zero value available in both measures.

## **Solved: How to exclude Zero values in Line chart ...**

Hi AUtfsAdmin, In your scenario, you used =If (Fields!FieldName.Value =-1, "Yes", "No") to dynamically display "Yes" or "No" based on the returned value of Boolean field while it gives you #ERROR, right? From my point of view, this error may result from the unmatched data type between FiledName.Value and -1.
