NTS has been a partner to defense and naval contractors for more than 50 years. In addition to the above, we can provide testing to other defense standards, including MIL-STD-120 (gage inspection), MIL-STD-248 (welding and brazing procedures), MIL-STD-516 (airworthiness) and MIL-STD-767 (control of hardware cleanliness).

Defense Testing & Certification Capabilities | NTS

We use a diverse range of stainless steels to solve various issues encountered when sealing hazardous gases and liquids in nuclear propulsion systems and pressurized water reactors. Our nuclear seal ring production processes are MIL-STD-2041 and MIL-STD-767 compliant, and all materials used are of US origin, with documentation available as needed.
